Scored: QRD12

I. Scale Description

The Questions Regarding Driving measure is a 14-item instrument taken from the Pittsburgh Youth Survey. Fast Track added the measure to the child instrument battery in study year 8. The measure assesses whether the child has ever driven and if so, how often, whether the child has a driver's license or a permit, and whose car the child drives, where the child goes when he/she uses the car, the child's experience with drinking or using drugs and driving, and the child's beliefs about drinking and driving. Only students who responded "yes" to having ever driven a car were asked questions about their driving activities. Only students who reported that they had been a passenger in a car driven by someone who had been drinking or using drugs were asked the subsequent question about frequency.

II. Report Sample

These analyses were conducted with the first cohort on the control sample (n=155) and on the normative sample (n=387, N = 463 with overlap) during the twelfth year of the study. Overall, 118 records were missing the whole measure. Forty-three were missing from the control sample (5 from Durham, 17 from Nashville, 9 from Pennsylvania, and 12 from Washington) and 105 were missing from the normative sample (14 from Durham, 39 from Nashville, 23 from Pennsylvania, and 29 from Washington).

III. Scaling

For the items in this instrument, there is no obvious scoring. Only students who responded yes to having ever driven a car were asked the subsequent questions about the frequency and their driving experiences. Only students who reported that they had been a passenger in a car driven by someone who had been drinking or using drugs were asked the subsequent question about frequency.

The design of this measure allows certain questions to be skipped if the respondent answered “no” to the previous question. If the child answered “no” to question 1, he/she answered question 2, then skipped to question 11. If the child answered “no” to question 11, he/she skipped to question 13. Although no values were entered for the skipped questions, these are not considered missing data; rather, because of the “no” response to the preceding question (question 1 or 11), the responses to questions 2 through 10 and question 12, respectively, are actually “no.” For the purposes of these technical report analyses, if a respondent answered “no” to question 1, his/her answers to questions 2 through 10 were considered to be “no” and coded as a “0.” Likewise, if a respondent answered “no” to question 11, his/her answer to question 12 was considered to be “no” and coded as a “0.”

Note that for question 3 (C11AS7), 0 represented never, 1 represented every day, 2 represented once a week or more, and 3 represented less than once a week. For these analyses, the responses for question 3 were recoded (C11AS7r) to show an increasing scale of frequency, as follows: 0 represents never, 1 represents less than once a week, 2 represents once a week or more, and 3 represents every day.

IV. Differences Between Groups

Chi-square tests of independence were used to assess the differences between the high-risk control and normative groups for question 1 (Have you ever driven a car?), question 4 (Whose car do you use when you drive?), question 5 (Where do you usually go when you have the use of the car?), question 6 (Have you ever driven a car after you had been drinking or had used drugs?), question 8 (Have you ever caused an accident or done damage to a car?), question 10 (Was anyone injured or did anyone die as a result?), and question 11 (Have you ever been a passenger in a car driven by someone who had been drinking or who had used drugs prior to driving?). The design of the measure allowed for questions 4, 5, and 10 to be broken down as follows, so that yes/no responses were possible.

Question 4 – Whose car do you use when you drive?

- Whose car do you use when you drive – parents’? (C12AS8)
- Whose car do you use when you drive – other relative’s? (C12AS9)
- Whose car do you use when you drive – own? (C12AS10)
- Whose car do you use when you drive – friend’s? (C12AS11)
- Whose car do you use when you drive – other? (C12AS12)

Question 5 – Where do you usually go when you have the use of the car?

- Where do you usually go when you have the use of the car – just cruise around? (C12AS14)
- Where do you usually go when you have the use of the car – party? (C12AS15)
- Where do you usually go when you have the use of the car – friend’s place? (C12AS16)
- Where do you usually go when you have the use of the car – work? (C12AS17)
- Where do you usually go when you have the use of the car – school? (C12AS18)
- Where do you usually go when you have the use of the car – other? (C12AS19)

Question 10 – Was anyone injured or did anyone die as a result?

- Was anyone injured or did anyone die as a result – no injury or death? (C12AS25)
- Was anyone injured or did anyone die as a result – physical injury to self? (C12AS26)
- Was anyone injured or did anyone die as a result – physical injury to others? (C12AS28)
- Was anyone injured or did anyone die as a result – death? (C12AS30)

It should be noted that the respondents were asked to “check all that apply” for questions 4 and 5.

Because there were no “yes” responses to C12AS30 (Was anyone injured or did anyone die as a result – death?) for either the high-risk control group or the normative group, chi-square analyses were not performed for these questions.

Chi Square Test Results by Group						
Variable	0=No 1=Yes		DF	Chi Square Statistic	P-value	N
	Control Proportions	Normative Proportions				
C12AS5 – Have you ever driven a car?	0.90	0.86	1	1.52	0.218	345
C12AS8 – Whose car do you use when you drive – parents’?	0.37	0.42	1	1.20	0.273	282
C12AS9 – Whose car do you use when you drive – other relative’s?	0.22	0.17	1	1.36	0.244	282
C12AS10 – Whose car do you use when you drive – own?	0.28	0.37	1	2.55	0.110	282
C12AS11 – Whose car do you use when you drive – friend’s?	0.24	0.13	1	6.83	0.009	282
C12AS12 – Whose car do you use when you drive – other?	0.08	0.05	1	0.55	0.458	282
C12AS14 – Where do you usually go when you have the use of the car – jus cruise around?	0.45	0.39	1	1.29	0.256	282
C12AS15 – Where do you usually go when you have the use of the car – party?	0.10	0.08	1	0.11	0.736	282
C12AS16 – Where do you usually go when you have the use of the car – friend’s place?	0.33	0.33	1	0.01	0.930	282
C12AS17 – Where do you usually go when you have the use of the car – work?	0.23	0.33	1	5.18	0.023	282
C12AS18 – Where do you usually go when you have the use of the car – school?	0.20	0.31	1	4.66	0.031	282
C12AS19 – Where do you usually go when you have the use of the car – other?	0.31	0.35	1	0.29	0.591	282
C12AS21 – Have you ever driven a car after you had been drinking or had used drugs?	0.08	0.04	1	4.42	0.036	344
C12AS23 – Have you ever caused an accident or done damage to a car?	0.11	0.12	1	0.19	0.662	344
C12AS25 – Was anyone injured or did anyone die as a result – no injury or death?	0.09	0.11	1	0.52	0.470	344
C12AS26 – Was anyone injured or did anyone die as a result – physical injury to self?	0.01	0.01	1	0.29	0.591	344
C12AS28 – Was anyone injured or did anyone die as a result – physical injury to others?	0.01	0.00	1	0.29	0.591	344
C12AS31 – Have you ever been a passenger in a car driven by someone who had been drinking or who had used drugs prior to driving?	0.23	0.13	1	9.59	0.020	344

Five of the items tested showed significant chi-square statistics: question 4 – Whose car do you use when you drive - friend’s (C12AS11), question 5 – Where do you usually go when you have the use of the car - work (C12AS17), question 5 – Where do you usually go when you have the use of the car - school (C12AS18), question 6 – Have you ever driven a car after you had been drinking or had used drugs (C12AS21), and question 11 – Have you ever been a passenger in a car driven by someone who had been drinking or had used drugs prior to driving (C12AS31).

With $\chi^2 (1, N = 282) = 6.8338$, $p = 0.0089$, the hypothesis of independence between risk category (normative or control) and C12AS11 (Whose car do you use when you drive – friend’s?) was rejected for

these data. Almost 24 percent of the high-risk control group reported that when they drive, they sometimes drive a friend's car as compared to only about 12 percent of the normative group.

With $\chi^2 (1, N = 282) = 5.1801$, $p = 0.0228$, the hypothesis of independence between risk category (normative or control) and C12AS17 (Where do you usually go when you have the use of the car – work?) was rejected for these data. Almost 36 percent of the normative group reported that when they have the use of the car, they usually go to work, as compared to about 23 percent of the high-risk control group.

With $\chi^2 (1, N = 282) = 4.6617$, $p = 0.0308$, the hypothesis of independence between risk category (normative or control) and C12AS18 (Where do you usually go when you have the use of the car – school?) was rejected for these data. Almost 33 percent of the normative group reported that when they had the use of the car, they usually went to school, as compared to 20 percent of the high-risk control group.

With $\chi^2 (1, N = 344) = 4.4160$, $p = 0.0356$, the hypothesis of independence between risk category (normative or control) and C12AS21 (Have you ever driven a car after you had been drinking or had used drugs?) was rejected for these data. Eight percent of the high-risk control group reported that they had driven a car after they had been drinking or had used drugs, as compared to only three percent of the normative group.

With $\chi^2 (1, N = 344) = 9.5936$, $p = 0.0020$, the hypothesis of independence between risk category (normative or control) and C12AS31 (Have you ever been a passenger in a car driven by someone who had been drinking or who had used drugs prior to driving?) was rejected for these data. Twenty-three percent of the high-risk control sample reported that they had been passengers in a car driven by someone who had been drinking or had used drugs prior to driving, as compared to about 11 percent of the normative sample.

Chi-square tests were also performed on question 2 (C12AS6 – Do you have a driver's license or a permit?). For this question, 0 = no, 1 = license, and 2 = permit. The frequency distribution of item 2 (C12AS6) among the control and normative samples was:

Table of C12AS6 by group			
C12AS6 (Do you have a driver's license or permit?)	Group		Total
Frequency Percent Row Percent Column Percent	Control	Normative	
0 (no)	60 17.44 36.59 53.57	104 30.23 63.41 44.83	164 47.67
1 (license)	33 9.59 26.61 29.46	91 26.45 73.39 39.22	124 36.05
2 (permit)	19 5.52 33.93 16.96	37 10.76 66.07 15.95	56 16.28
Total	112 32.56	232 67.44	344 100.00
Frequency Missing = 119			

With χ^2 (2, N = 345) = 3.2553, p = 0.1964, the hypothesis of independence between risk category (normative or control) and question 2 was not rejected for these data.

T-tests were used to examine group differences for question 3 (C12AS7r – In the past year, how often have you driven a car?), question 7 (C12AS22 – In the past year, how often have you driven a car after you had been drinking or had used drugs?), question 9 (C12AS24 – How many times have you caused an accident or done damage to a car?), question 12 (C12AS32 – In the past year, how many times have you been a passenger in a car driven by someone who had been drinking or who had used drugs prior to driving?), and question 13 (C12AS33 – After how many drinks do you think it is unsafe to drive?). Note that for question 3, 0 represents never, 1 represents less than once a week, 2 represents once a week or more, and 3 represents every day. For the other questions, respondents entered the actual number of occurrences. Analyses revealed no significant differences between the normative youth and their high-risk control counterparts for these five items.

Comparison of Variable Means for Normative and Control							
Variable	Normative		Control		DF	t Value	Pr > t
	Mean	Std Dev	Mean	Std Dev			
C12AS7r – In the past year, how often have you driven a car?	1.86	1.16	1.72	1.08	342	-1.03	0.3026
C12AS22 – In the past year, how often have you driven a car after you had been drinking or had used drugs?	0.20	1.61	0.37	2.16	343	0.81	0.4185
C12AS24 – How many times have you caused an accident or done damage to a car?	0.17	0.59	0.14	0.42	342	-0.59	0.5585
C12AS32 – In the past year, how many times have you been a passenger in a car driven by someone who had been drinking or who had used drugs prior to driving?	0.80	4.08	1.09	3.46	343	0.65	0.5159
C12AS33 – After how many drinks do you think it is unsafe to drive?	1.95	1.47	2.12	2.35	342	0.81	0.4178

V. Recommendations for Use

Analysts should note that the skip patterns used for this measure resulted in the need to recode the data to get an accurate number of “no” responses and missing. As described earlier, the design of this measure allows certain questions to be skipped if the respondent answered “no” to the previous question. If the child answered “no” to question 1, he/she answered question 2, then skipped to question 11. If the child answered “no” to question 11, he/she skipped to question 13. Although no values were entered for the skipped questions, these are not considered missing data; rather, because of the “no” response to the preceding question (question 1 or 11), the responses to questions 2 through 10 and question 12, respectively, are actually “no.” For the purposes of these technical report analyses, if a respondent answered “no” to question 1, his/her answers to questions 2 through 10 were considered to be “no” and coded as a “0.” Likewise, if a respondent answered “no” to question 11, his/her answer to question 12 was considered to be “no” and coded as a “0.”

Analysts should also note that while respondents entered the actual number of occurrences for question 7 (C12AS22), question 9 (C12AS24), question 12 (C12AS32), and question 13 (C12AS33), the allowed responses for question 3 (C12AS7 – In the past year, how often have you driven a car?) were as follows: 0 = never, 1 = every day, 2 = once a week or more, and 3 = less than once a week. Because this does not follow a pattern of increasing frequency of occurrences as numbered response increases, responses were recoded as follows: 0 = never, 1 = less than once a week, 2 = once a week or more, and 3 = every day.

Additionally, analysts should be aware that although the question was phrased as a yes/no question, the allowed responses for question 2 (C12AS6 – Do you have a drivers license or permit?) were 0 = no, 1 = license, and 2 = permit.

V1. Item and Scale Means and SD's

Descriptive Statistics for High Risk Control Sample						
Variable	Label	N	Mean	Std Dev	Minimum	Maximum
C12AS5	Have you ever driven a car?	112	0.90	0.30	0.00	1.00
C12AS8	Whose car do you use when you drive – parents' suicide?	93	0.37	0.48	0.00	1.00
C12AS9	Whose car do you use when you drive – other relative's?	93	0.22	0.41	0.00	1.00
C12AS10	Whose car do you use when you drive – own?	93	0.28	0.45	0.00	1.00
C12AS11	Whose car do you use when you drive – friend's?	93	0.24	0.43	0.00	1.00
C12AS12	Whose car do you use when you drive – other?	93	0.08	0.27	0.00	1.00
C12AS14	Where do you usually go when you have the use of the car – just cruise around?	93	0.45	0.50	0.00	1.00
C12AS15	Where do you usually go when you have the use of the car – party?	93	0.10	0.30	0.00	1.00
C12AS16	Where do you usually go when you have the use of the car – friend's place?	93	0.33	0.47	0.00	1.00
C12AS17	Where do you usually go when you have the use of the car – work?	93	0.23	0.42	0.00	1.00
C12AS18	Where do you usually go when you have the use of the car – school?	93	0.20	0.41	0.00	1.00
C12AS19	Where do you usually go when you have the use of the car – other?	93	0.31	0.47	0.00	1.00

Descriptive Statistics for High Risk Control Sample						
Variable	Label	N	Mean	Std Dev	Minimum	Maximum
C12AS21	Have you ever driven a car after you had been drinking or had used drugs?	111	0.08	0.27	0.00	1.00
C12AS22	In the past year, how often have you driven a car after you had been drinking or had used drugs?	112	0.37	2.16	0.00	20.00
C12AS23	Have you ever caused an accident or done damage to a car?	111	0.11	0.31	0.00	1.00
C12AS24	How many times have you caused an accident or done damage to a car?	111	0.14	0.42	0.00	2.00
C12AS25	Was anyone injured or did anyone die as a result – no injury or death?	111	0.09	0.29	0.00	1.00
C12AS26	Was anyone injured or did anyone die as a result – physical injury to self?	111	0.01	0.09	0.00	1.00
C12AS28	Was anyone injured or did anyone die as a result – physical injury to others?	111	0.01	0.09	0.00	1.00
C12AS30	Was anyone injured or did anyone die as a result – death?	112	0.00	0.00	0.00	0.00
C12AS31	Have you ever been a passenger in a car driven by someone who had been drinking or who had used drugs prior to driving?	111	0.23	0.43	0.00	1.00
C12AS32	In the past year, how many times have you been a passenger in a car driven by someone who had been drinking or who had used drugs prior to driving?	112	1.09	3.46	0.00	30.00
C12AS33	After how many drinks do you think it is unsafe to drive?	111	2.12	2.35	1.00	22.00

Descriptive Statistics for Normative Sample						
Variable	Label	N	Mean	Std Dev	Minimum	Maximum
C12AS5	Have you ever driven a car?	282	0.86	0.35	0.00	1.00
C12AS8	Whose car do you use when you drive – parents' suicide?	228	0.42	0.49	0.00	1.00
C12AS9	Whose car do you use when you drive – other relative's?	228	0.17	0.38	0.00	1.00
C12AS10	Whose car do you use when you drive – own?	228	0.37	0.48	0.00	1.00
C12AS11	Whose car do you use when you drive – friend's?	228	0.13	0.33	0.00	1.00
